PROFESSIONAL SUMMARY

Full-Stack & AI Engineer based in Berlin specializing in **Python**, **TypeScript**, **React**, **Next.js**, and **PostgreSQL**. Experienced in engineering production web applications, automated Selenium workflows, and LLM API integrations. Strong foundation in software architecture, database design, and clean code; seeking a **Working Student Software Engineer** position.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL, C++, HTML5, CSS3

Frontend: Next.js, React, Tailwind CSS, Zustand, Context API, HTML/CSS

Backend & Databases: PostgreSQL, Supabase, Flask, Django, RESTful APIs, Relational Schema Design

AI / ML: Google Gemini API, Scikit-learn, Pandas, NLP Processing, Predictive Data Pipelines

Developer Tools & Cloud: Git, GitHub, Docker, GitLab, Selenium WebDriver, Chrome Extension API, Vercel

WORK EXPERIENCE

Co-Founder & Full-Stack Engineer

SimpleGerman

Apr 2026 – Present

Berlin, Germany (Remote)

- Architected and deployed an AI-driven language learning web platform using **Next.js**, **TypeScript**, **Supabase**, and **PostgreSQL**.
- Designed a flexible content engine enabling structured grammar modules, story modes, and dynamic quiz generation.
- Built real-time learning flows with client-side state management to track progress and deliver instant user feedback.
- Engineered PostgreSQL database schemas and serverless API routes for user session management and data persistence.

PROJECTS

AI WhatsApp Chatbot Automation [\[GitHub\]](#) — Python, Selenium, Gemini API

Jan 2025 – Feb 2025

- Developed a Python automation framework using Selenium WebDriver to programmatically inspect DOM state and extract WhatsApp Web messages.
- Integrated Google Gemini API to analyze message context and programmatically dispatch automated, context-aware responses.

AI-Powered Micro Habit Tracker [\[GitHub\]](#) — Python, React, Scikit-learn, Pandas, Gemini API

2024 – 2025

- Engineered a web application calculating streak analytics and habit adherence metrics from user activity logs.
- Built predictive analytics pipelines using Python, Pandas, and Scikit-learn to model completion probabilities over time.

Website Dwell Time Extension [\[GitHub\]](#) — JavaScript, TypeScript, Chrome Extension API

Apr 2025

- Built a cross-browser extension using JavaScript and Chrome APIs to monitor domain-level dwell time in real time with background listeners.
- Rendered real-time activity dashboards using Chart.js to visualize daily browsing habits and highlight focus bottlenecks.

Vani – Voice-Activated AI Assistant [\[GitHub\]](#) — Python, Gemini API, SpeechRecognition, NLP

2024 – 2025

- Developed a Python voice assistant parsing spoken audio commands into execution workflows using SpeechRecognition and NLP primitives.
- Integrated Google Gemini API alongside weather and news REST APIs to synthesize and render real-time responses to natural language queries.

EDUCATION

Bachelor of Science in Software Engineering

University of Europe for Applied Sciences

Mar 2026 – Present

Potsdam / Berlin, Germany

Pathway Programme in Computer Science (Studienkolleg)

IU International University of Applied Sciences

Apr 2025 – Jan 2026

Berlin, Germany
